

READY FOR THE CNC-MARATHON?

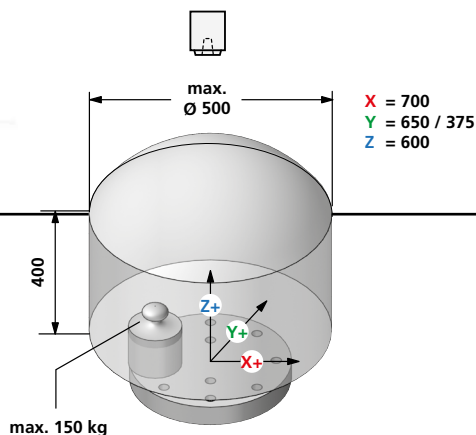

**WORKHOLDING SOLUTIONS FOR LONGER
AND MORE PRODUCTIVE CNC-MARATHONS**

- ✓ Optimum utilisation of the machining space
- ✓ Best CNC-Marathon times

system

80 km Ultramarathon

The 5-axis multiple workholding pyramid „Sputnik II“ handles even the longest marathons. The high clamping density ensures a very long machine running time.

- ✓ 8 clamping areas
- ✓ Large jaw variety
- ✓ Jaw quick change-system
- ✓ Modular
- ✓ Direct stamping technology (3mm)
- ✓ Good accessibility
- ✓ Swissmade

Articles in use:
1 x 5AXMCZ100-45-8
1 x Riser
16 x B175-64

21 km Half Marathon

The 3D modular multiple workholding system „powerCLAMP“ not only runs marathons. Because of its flexibility it is also capable of handling other workholding disciplines. Allowing the clamping of 1, 2, 4 components at time.

- ✓ 3D Modular (High flexibility)
- ✓ Over 200 modules available
- ✓ powerCLAMP interface
- ✓ Side clamp system for a quick changeover
- ✓ Expandable (3AX / 4AX / HMC)
- ✓ Direct stamping technology (3mm)
- ✓ Swissmade

Articles in use:
2 x PCB4050400
2 x PAND94-34PRF-A1
4 x PS1PF94L34-105
4 x B120P

42 km Mountain Marathon

Steep mountain roads? No problem! The slanted powerCLAMP base rails are particularly suitable for 5-axis machining. Due to the modular system, 8 clamping areas are also possible.

- ✓ 3D Modular (High flexibility)
- ✓ Over 200 modules available
- ✓ powerCLAMP interface
- ✓ Side clamp system for a quick changeover
- ✓ Expandable
- ✓ Direct stamping technology (3mm)
- ✓ Swissmade

Articles in use:
4 x PCB50207W25
4 x PAND94-34PRF-A1
4 x PS1PF94L34-105
4 x B120P

1000 m Sprint

If it has to be „centric clamping“ and you do not want to lose the flexibility of the powerCLAMP system, this is the ideal solution. The set-up can be expanded with additional modules.

- ✓ 3D Modular (High flexibility)
- ✓ Over 200 modules available
- ✓ powerCLAMP interface
- ✓ Modules can be moved in 2mm steps
- ✓ Side clamp system for a quick changeover
- ✓ Expandable (3AX / 4AX / HMC)
- ✓ Direct stamping technology (3mm)
- ✓ Swissmade

Articles in use:
1 x PCB100400H60
2 x PCZ100L50
2 x B175-45

Adjustable clamping range.
The self-centering vises can be laterally
moved over the entire length in 2 mm
steps.
