

Flange mounted holders

HIGHLIGHTS

INCREASE PRODUCTIVITY IN YOUR PRODUCTION: ARNO FLANGE MOUNTED HOLDERS.

When it comes to grooving applications, ARNO is one of the best. One of the reasons for this are our flange mounted holders which provide maximum stability for parting off and grooving. We offer worldwide the widest range of flange mounted holders – for monoblock holders, modules or blades – for many different machine manufacturers and types. And because satisfied customers want to equip more and more machines with them, we are continuously designing new types.

THE CONNECTION TO MAXIMUM STABILITY.

One interface less for more process reliability: with flange mounted holders for monoblock holders, grooving modules and grooving blades.

Reliability is the top priority in grooving and parting off operations. Our flange mounted holders are specially optimised for each machine to eliminate an interface and therefore get rid of one more error source. They are perfectly designed to guarantee maximum stability. Whether your requirement is for a monoblock holder, grooving module or grooving blade – we offer you the corresponding flange mounted holder for every application and for many machine types.

Perfect combination – flange mounted holders and grooving modules.

ARNO tip: combine flange mounted holders and grooving modules – this combines the advantages of monoblock holders and blades.

STABLE ADVANTAGES

of ARNO flange mounted holders

Reliable processes – maximum stability
thanks to perfectly matched holders

With internal cooling – reduced insert
wear, optionally with ACS

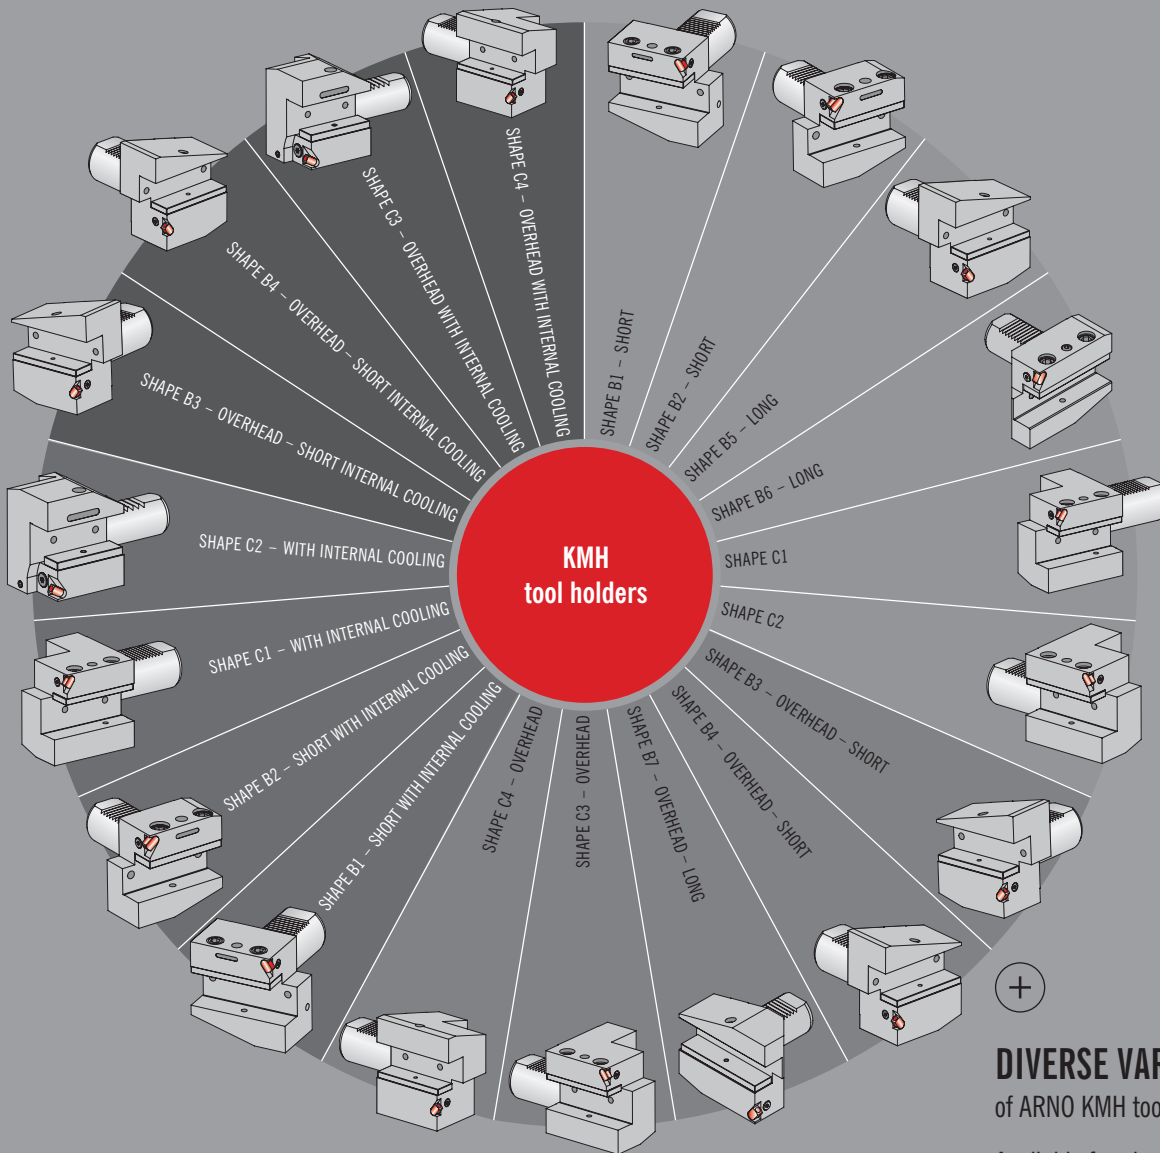

Versatile – for normal or upside down assembly
and for a grooving range of 20 to 140 mm
and widths of 1.5 to 6 mm

AND MANY MORE

FLEXIBLE HOLD.

Equipped for all cases: with KMH tool holders from ARNO.

KMH tool holders are available for almost every machine type – with or without internal cooling – and are also suitable for ACS toolholders. Instead of monoblock holders, grooving modules and blades can also be fitted using suitable adapters. Then you benefit from stability and flexibility in every case.

DIVERSE VARIETY OF ADVANTAGES

of ARNO KMH tool holders

Available for almost every machine type

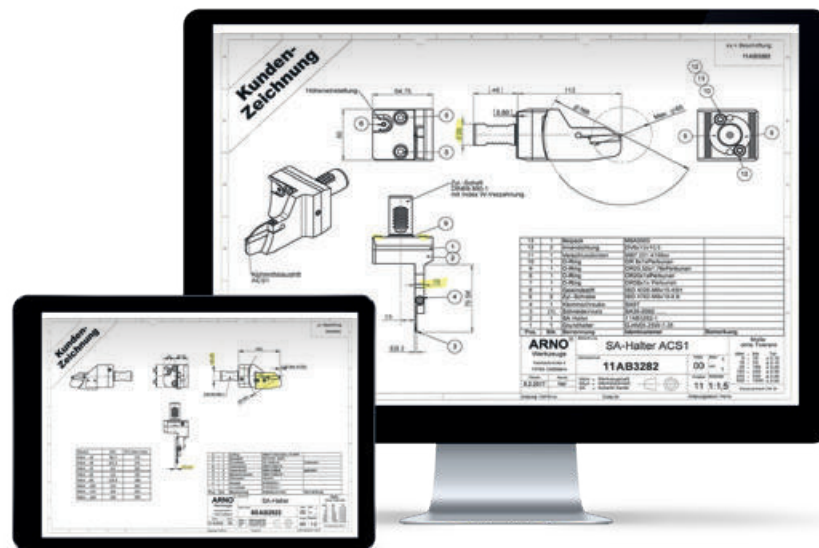

With or without internal cooling or ACS

Different possibilities to mount

TAILOR-MADE SOLUTIONS FOR YOUR MACHINES.

Just what you need: Special flange mounted holders from ARNO.

ARNO offers you a wide range of flange mounted holders for different machine manufacturers and types. And the program is continuously increasing. All thanks to our customers. When you are convinced by the advantages of our flange mounted holders on your machine with regard to stability and process reliability, you can also benefit from these advantages on other machines. That's why we are continuously expanding our portfolio – by producing the right flange mounted holders for your machine types.
